

The diagram illustrates a network topology. A central cloud labeled "PNNI ATM NETWORK" contains several nodes, labeled 102₁ through 102₉. These nodes are interconnected by links labeled 103₁ through 103₁₄. The network is connected to external components: a rectangular block labeled 105₁ is connected to node 102₁ via link 103₁; another rectangular block labeled 105₂ is connected to node 102₇ via link 103₁₄. A cloud labeled "NETWORK MANAGEMENT" with the number 104 below it is connected to the central network cloud. The overall structure represents a complex, multi-ported network environment.
